

# How it works

## Step 1

Visit [pennopen.med.upenn.edu/campus](https://pennopen.med.upenn.edu/campus) on your mobile device/computer.

Your program may conduct a verbal attestation process on campus if you do not have a mobile device/computer.

## Step 2

Complete your vaccination, symptom and exposure check. Answer these questions on the day of your visit before arriving on campus.

Screening reduces the risk that any COVID-19 case could lead to infecting others on campus.

## Step 3

When you report full vaccination against COVID-19, no symptoms, no recent contact with someone who may have COVID-19, and no recent positive test, you get a Green Pass.

Stay home and contact your primary care provider if you do not get a Green Pass.

## Step 4

Show your Green Pass as requested on campus or at University-sponsored events.

Wear a face mask, keep physical distance, wash hands, and follow other University public health directions, regardless of your vaccination status.
