Verbal Attestation Process

Do you meet any of these criteria?

1) New cough
2) New difficulty breathing
3) New loss of taste or smell
4) Fever above 100F or feeling feverish (chills, bodyache)
5) Two or more of the following symptoms:
   a. Vomiting or diarrhea
   b. Loss of appetite
   c. Unusual fatigue
   d. New rash on fingers or toes

Vaccine Alert!
Do not report symptoms of unusual fatigue, fevers, or chills if you received a COVID vaccine within the past 48 hours. If you have other symptoms or these symptoms persist beyond 48 hours, report as usual.

6) Contact in the past week with someone who has a new fever, new cough, new shortness of breath, or has been newly diagnosed with COVID-19

Testing Positive and PPE Alert!
Do not include contact if you have tested positive for COVID-19 in the past 90 days, or when you and the other person (e.g., patient or coworker) had on appropriate PPE.

7) Positive COVID-19 test in the past 10 days
